

CLINICAL PAYMENT AND CODING POLICY

If a conflict arises between a Clinical Payment and Coding Policy (CPCP) and any plan document under which a member is entitled to Covered Services, the plan document will govern. If a conflict arises between a CPCP and any provider contract pursuant to which a provider participates in and/or provides Covered Services to eligible member(s) and/or plans, the provider contract will govern. "Plan documents" include, but are not limited to, Certificates of Health Care Benefits, benefit booklets, Summary Plan Descriptions and other coverage documents. BCBSTX may use reasonable discretion interpreting and applying this policy to services being delivered in a particular case. BCBSTX has full and final discretionary authority for their interpretation and application to the extent provided under any applicable plan documents.

Providers are responsible for submission of accurate documentation of services performed. Providers are expected to submit claims for services rendered using valid code combinations from Health Insurance Portability and Accountability Act (HIPAA) approved code sets. Claims should be coded appropriately according to industry standard coding guidelines including, but not limited to: Uniform Billing (UB) Editor, American Medical Association (AMA), Current Procedural Terminology (CPT®), CPT® Assistant, Healthcare Common Procedure Coding System (HCPCS), ICD-10 CM and PCS, National Drug Codes (NDC), Diagnosis Related Group (DRG) guidelines, Centers for Medicare and Medicaid Services (CMS) National Correct Coding Initiative (NCCI) Policy Manual, CCI table edits and other CMS guidelines.

Claims are subject to the code edit protocols for services/procedures billed. Claim submissions are subject to claim review including but not limited to, any terms of benefit coverage, provider contract language, medical policies, clinical payment and coding policies as well as coding software logic. Upon request, the provider is urged to submit any additional documentation.

Preventive Services Policy

Policy Number: CPCP006

Version: 1.0

Enterprise Clinical Payment and Coding Policy Committee Approval Date: August 18, 2022

Effective Date: September 1, 2022

Definitions

The following acronyms have been utilized throughout this reimbursement policy

ACIP: Advisory Committee on Immunization Practices
CDC: Centers for Disease Control and Prevention
FDA: United States Food and Drug Administration
HRSA: Health Resources and Services Administration

PPACA: Patient Protection and Affordable Care Act of 2010

USPSTF: United States Preventive Services Task Force

Description

Section 2713 of the Patient Protection and Affordable Care Act (PPACA) mandates that private health plans provide coverage of preventive services issued by the following agencies: The United States Preventive Services Task Force (USPSTF), the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC), and the Health Resources and Service Administration (HRSA) with respect to women's guidelines and guidelines for infants, children, and adolescents. These services are available at no cost-share when obtained by a member covered under a non-grandfathered plan. This applies to members belonging to individual, small group, large group, and self-insured plans. There is no copay, deductible or coinsurance, even if the individual or family deductible or out-of-pocket maximum has not been met as long as the member utilizes a provider in the plan's network.

Preventive care or preventive medicine refers to measures or services taken to promote health and early detection/prevention of disease(s) and injuries rather than treating them and/or curing them. Preventive care may include, but are not limited to, examinations and screening tests tailored to an individual's age, health, and family history.

PPACA does not mandate that preventive services be covered at no member cost-share when obtained out-of-network. Members that obtain preventive services out of their network will be subject to copay, deductible, and coinsurance.

Grandfathered plans are plans that have been in existence prior to March 23, 2010 and are exempt from the requirement of providing preventive services at no member cost share. Grandfathered plans have the opportunity to elect providing coverage of preventive services at no member cost share but are not required to do so.

The USPSTF applies a letter grade for each of the recommendations that are released. The grade definitions for USPSTF recommendations released after July 2012 are as follows https://www.uspreventiveservicestaskforce.org/Page/Name/grade-definitions

Following the recommendation of the USPTF coverage of Grade "A" and "B" recommendations is provided at no member cost share for members with a non-grandfathered health plan. The USPTF published recommendations can be found at

https://www.uspreventiveservicestaskforce.org/BrowseRec/Index

Grade	Definition
Α	The USPSTF recommends the service. There is high certainty that the net benefit is substantial.
В	The USPSTF recommends the service. There is high certainty that the net benefit is moderate or there is moderate certainty that the net benefit is moderate to substantial.
С	The USPSTF recommends selectively offering or providing this service to individual patients based on professional judgment and patient preferences. There is at least moderate certainty that the net benefit is small.
D	The USPSTF recommends against the service. There is moderate or high certainty that the service has no net benefit or that the harms outweigh the benefits.
I	The USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of the service. Evidence is lacking, of poor quality, or conflicting, and the balance of benefits and harms cannot be determined.

The ACIP publishes recommendations on the safe utilization of vaccines. ACIP's recommendations include immunization schedules for children and adolescents as well as adults which can be found at https://www.cdc.gov/vaccines/schedules/hcp/index.html. Travel Immunizations such as, but not limited to, Japanese Encephalitis, Typhoid, Yellow Fever, and Small Pox are excluded from Preventive Service coverage. Other excluded vaccinations include Anthrax, Bacille Calmette Guerin for Tuberculosis (BCG), and Rabies which are not required by PPACA. Immunizations should be administered in accordance with the ACIP Recommended Child and Adult Immunization Schedules or in accordance with state law or regulations.

HRSA releases Women's Preventive Services guidelines that are aimed at improving women's health by recommending certain preventive services that should be obtained in the clinical setting. HRSA's list of recommendations can be obtained at https://www.hrsa.gov/womensguidelines2016/index.html

HRSA endorses preventive guidelines established by the American Academy of Pediatrics for the health and well-being of infants, children, and adolescents. These recommendations are referred to as Bright Futures and the comprehensive list of Bright Future's recommendations can be found at https://www.aap.org/en-us/Documents/practicet_periodicity_AllVisits.pdf

Reimbursement Information:

Certain preventive care services may be considered eligible for coverage under the member's benefit plan as required by PPACA and/or an applicable state mandate. In general, these services include, but are not limited to, screenings, immunizations, and other types of care as recommended by the United States Federal Government.

These services are not subject to application of cost-sharing such as co-payments, co-insurance or deductibles when they are considered eligible for coverage and are provided by a network provider. In order for preventive claims to process at the preventive level with no member cost share, the claim must include a preventive diagnosis code, a preventive procedure code, meet medical policy review criteria, and fall within the guidelines issued by the USPSTF, ACIP, HRSA, or Bright Futures.

Health care providers (facilities, physicians and other health care professionals) are expected to exercise independent medical judgement in providing care to patients. This Preventive Services Reimbursement policy is not intended to impact care decisions or medical practice.

The following grid provides a list of the recommendations released by the USPSTF, ACIP, HRSA, or Bright Futures along with the corresponding procedure codes and diagnosis codes deemed to be preventive.

USPSTF Recommendations:

Service:	Procedure	Additional
	Code(s):	Reimbursement Criteria:
Abdominal Aortic Aneurysm Screening USPSTF "B" Recommendation December 2019	76706	Procedure code 76706 is reimbursable as preventive when submitted with one of the following: Z13.6, Z87.891, Z72.0,
The USPSTF recommends 1-time screening for abdominal aortic aneurysm (AAA) with ultrasonography in men aged 65 to 75 years who have ever smoked.		Z00.00, Z00.01, F17.210, F17.200
Unhealthy Alcohol Use in Adolescents and	99385, 99386, 99387,	Payable with a diagnosis code in
Adults: Screening and Behavioral Counseling	99395, 99396, 99397,	Diagnosis List 1
Interventions	99408, 99409, G0396, G0397,	
USPSTF "B" Recommendation November 2018	G0442, G0443	
The USPSTF recommends screening for unhealthy alcohol use in primary care settings		
for adults 18 years or older, including pregnant women, and providing persons		
engaged in risky or hazardous drinking with brief behavioral counseling interventions to		
reduce unhealthy alcohol use.		

Aspirin Use to Prevent Preeclampsia and Related Morbidity and Mortality: Preventive Medication USPSTF "B" Recommendation September 2021 The USPSTF recommends the use of low-dose aspirin (81 mg/day) as preventive medication after 12 weeks of gestation in persons who are at high risk for preeclampsia.	21007 27026 27022	For details about pharmacy benefit coverage, contact the number on the patient's BCBS member card. A patient's pharmacy benefit may be managed by a company other than BCBS. Coverage includes generic aspirin 81 mg tablets with a prescription.
Asymptomatic Bacteriuria in Adults Screening USPSTF "B" Recommendation September 2019 The USPSTF recommends screening for asymptomatic bacteriuria using urine culture in pregnant persons.	81007, 87086, 87088	Payable with a Pregnancy Diagnosis
BRCA-Related Cancer Risk Assessment, Genetic Testing USPSTF "B" Recommendation August 2019 USPSTF recommends that primary care clinicians assess women with a personal or family history of breast, ovarian, tubal, or peritoneal cancer or who have an ancestry associated with breast cancer susceptibility 1 and 2 (BRCA1/2) gene mutations with an appropriate brief familial risk assessment tool. Women with a positive result on the risk assessment tool should receive genetic counseling and, if indicated after counseling, genetic testing.	81212, 81215, 81216, 81217, 81162, 81163, 81164, 81165, 81166, 81167, 96040, 99385, 99386, 99387, 99395, 99396, 99397, 99401, 99402, 99403, 99404, G0463, S0265, 81307, 81308	These services are subject to Medical Policy and prior authorization may be required Procedure codes 81212, 81215-81217, 81162-81167, 81307 and 81308 are reimbursable as preventive when submitted with one of the following primary diagnosis codes: Z80.3, Z80.41, Z85.3, Z85.43 Procedure code 96040 is reimbursable as preventive when submitted with one of the following primary diagnosis codes: Z80.3 or Z80.41 All other procedure codes for BRCA are payable with a diagnosis in Diagnosis List 1
Breast Cancer Medications for Risk Reduction USPSTF "B" Recommendations September 2019 The USPSTF recommends that clinicians offer to prescribe risk-reducing medications, such		For details about pharmacy benefit coverage, contact the number on the patient's BCBS member card. A patient's pharmacy benefit may be managed by a company other than BCBS.

clinical risk assessment tool.		
Perinatal Depression: Preventive Interventions USPSTF "B" Recommendation February 2019 The USPSTF recommends that clinicians provide or refer pregnant and postpartum persons who are at increased risk of perinatal depression to counseling interventions	99385,99386, 99387, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 96160, 96161, G0444	Payable with a diagnosis code in Diagnosis List 1
Phenylketonuria in Newborns Screening USPSTF "A" Recommendation March 2008 The USPSTF recommends screening for phenylketonuria in newborns.	84030, 99381, S3620	Procedure codes 84030 and S3620 reimbursable at the preventive level for children 0-90 days old
USPSTF "B" Recommendation August 2021 The USPSTF recommends screening for prediabetes and type 2 diabetes in adults aged 35 to 70 years who have overweight or obesity. Clinicians should offer or refer patients with prediabetes to effective preventive interventions.	82947, 82948, 82950, 82951, 83036, 82952, 97802, 97803, 97804, 99401, 99402, 99403, 99404, G0270, G0271, G0447, G0473, S9470	Payable with a diagnosis code in Diagnosis List 1
Preeclampsia Screening USPSTF "B" Recommendation April 2017 The USPSTF recommends screening for preeclampsia in pregnant women with blood pressure measurements throughout pregnancy.		Preeclampsia screening is done through routine blood pressure measurements
Rh(D) Incompatibility Screening USPSTF "A" Recommendation February 2004 The USPSTF strongly recommends Rh(D) blood typing and antibody testing for all pregnant women during their first visit for pregnancy-related care. USPSTF "B" Recommendation February 2004 The USPSTF recommends repeated Rh(D) antibody testing for all unsensitized Rh(D)- negative women at 24 to 28 weeks' gestation, unless the biological father is known to be	80055, 86850, 86870, 86900, 86901, 36415	Payable with a pregnancy diagnosis

Rh(D)-negative.		
Sexually Transmitted Infections Behavioral Counseling USPSTF "B" Recommendation August 2020 The USPSTF recommends behavioral counseling for all sexually active adolescents and for adults who are at increased risk for sexually transmitted infections (STIs). Refer also to HRSA's 'Sexually Transmitted Infections Counseling' recommendation	99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, G0445	
Sickle Cell Disease (Hemoglobinopathies) in Newborns Screening USPSTF "A" Recommendation September 2007 The USPSTF recommends screening for sickle cell disease in newborns.	83020, 83021, 83030, 83033, 83051, 85004, 85013, 85014, 85018, 85025, 85027, 99381, G0306, G0307, S3620, S3850	
USPSTF "B" Recommendation March 2018 The USPSTF recommends counseling young adults, adolescents, children, and parents of young children about minimizing exposure to ultraviolet (UV) radiation for persons aged 6 months to 24 years with fair skin types to reduce their risk of skin cancer.	There are no procedure codes specific to skin cancer counseling.	
Statin Use for the Primary Prevention of Cardiovascular Disease in Adults Preventive Medication USPSTF "B" Recommendation November 2016 The USPSTF recommends that adults without a history of cardiovascular disease (CVD) (i.e., symptomatic coronary artery disease or ischemic stroke) use a low- to moderate-dose statin for the prevention of CVD events and mortality when all of the following criteria are met: 1) they are aged 40 to 75 years; 2) they have 1 or more CVD risk factors (i.e., dyslipidemia, diabetes, hypertension, or	80061, 82465, 83700, 83718, 83719, 83721, 84478	For details about pharmacy benefit coverage, contact the number on the patient's BCBS member card. A patient's pharmacy benefit may be managed by a company other than BCBS. Coverage includes atorvastatin 10 mg and 20 mg, lovastatin 20 mg and 40 mg tablets, pravastatin 10 mg, 20 mg, 40 mg, and 80 mg tablets for members ages 40 – 75 years of age with a prescription.

smoking); and 3) they have a calculated 10- year risk of a cardiovascular event of 10% or greater.		
Identification of dyslipidemia and calculation		
of 10-year CVD event risk requires universal lipids screening in adults aged 40 to 75 years.

HRSA Recommendations:

Service:	Procedure	Additional
	Code(s):	Reimbursement Criteria:
Anxiety Screening HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends screening for anxiety in adolescent and adult women, including those who are pregnant or postpartum.	96127, 99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, G0444	Procedure code 96127 is only reimbursable at the preventive level when billed with a diagnosis of Z00.129, Z13.31, Z13.32, Z13.39, Z13.41, or Z13.42
Breast Cancer Screening for Women at Average Risk HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends that average-risk women initiate mammography screening no earlier than age 40 and no later than age 50. Screening mammography should occur at least biennially and as frequently as annually. Screening should continue through at least age 74 and age alone should not be the basis to discontinue screening. These screening recommendations are for women at average risk of breast cancer. Women at increased risk should also undergo periodic mammography screening, however, recommendations for additional services are beyond the scope of this recommendation Refer also to USPSTF's 'Breast Cancer Screening' recommendation	77061, 77062, 77063, 77065, 77066, 77067, G0279	Payable with a diagnosis code in Diagnosis List 1

Food and Drug Administration-approved contraceptive methods, effective family planning practices, and sterilization procedures be available as part of contraceptive care. The full range of contraceptive methods for women currently identified by the U.S. Food and Drug Administration include: (1) sterilization surgery for women, (2) surgical sterilization via implant for women, (3) implantable rods, (4) copper intrauterine devices, (5) intrauterine devices with progestin (all durations and doses), (6) the shot or injection, (7) oral contraceptives (combined pill), 8) oral contraceptives (progestin only, and), (9) oral contraceptives (extended or continuous use), (10) the contraceptive patch, (11) vaginal contraceptive rings, (12) diaphragms, (13) contraceptive sponges, (14) cervical caps, (15) female condoms, (16) spermicides, and (17) emergency contraception (levonorgestrel), and (18) emergency contraception (ulipristal acetate), and additional methods as identified by the FDA. Additionally, instruction in fertility awareness-based methods, including the lactation amenorrhea method, although less effective, should be provided for women desiring an alternative method.

J7304, J7306, J7307, S4981, S4989, codes under HRSA's 'Well-Woman' recommendation

Procedure code 58340 reimbursable at the preventive level only when accompanied with modifier 33 or one of the following diagnosis codes: Z30.2, Z30.40, Z30.42, Z30.49, Z98.51,

Procedure codes 11981, 11982, and 11983 (are covered only when FDA approved contraceptive implant insertion or removal are performed) are reimbursable at the preventive level when billed with one of the following diagnosis codes: Z30.013, Z30.017, Z30.018, Z30.019, Z30.09, Z30.40, Z30.42, Z30.46, Z30.49, Z30.8, Z30.9

Procedure code 58661 reimbursable at the preventive level with a diagnosis of Z30.2

For details about pharmacy benefit coverage, contact the number on the patient's BCBS member card. A patient's pharmacy benefit may be managed by a company other than BCBS.

Prescription required for both over-the-counter (OTC) and prescription medications. For the list of contraceptive methods that may be covered, visit your health plan website.

Diabetes Mellitus Screening after Pregnancy	82947, 82948,	Payable with a diagnosis code in
Diabetes Weintus Scieening after Fregulaticy	82950, 82951,	Diagnosis List 1
HRSA Recommendation	83036	DIABIIO313 LIST I
December 2019	03030	
The Women's Preventive Services Initiative		
recommends women with a history of		
gestational diabetes mellitus (GDM) who are		
not currently pregnant and who have not		
been previously diagnosed with type 2		
diabetes mellitus should be screened for		
diabetes mellitus. Initial testing should ideally		
occur within the first year postpartum and can		
be conducted as early as 4–6 weeks		
postpartum. Women with a negative initial		
postpartum screening test result should be		
rescreened at least every 3 years for a		
minimum of 10 years after pregnancy. For		
women with a positive postpartum screening		
test result, testing to confirm the diagnosis of		
diabetes is indicated regardless of the initial		
test (e.g., oral glucose tolerance test, fasting		
plasma glucose, or hemoglobin A1c). Repeat		
testing is indicated in women who were		
screened with hemoglobin A1c in the first 6		
months postpartum regardless of the result.		
Gestational Diabetes	82947, 82948,	Payable with a pregnancy
	82950, 82951,	diagnosis
HRSA Recommendation December 2019	83036	
The Women's Preventive Services Initiative		
recommends screening pregnant women for		
gestational diabetes mellitus after 24 weeks of		
gestation (preferably between 24 and 28		
weeks of gestation) in order to prevent		
adverse birth outcomes. Screening with a 50 g		
oral glucose challenge test (followed by a 3-		
hour 100 g oral glucose tolerance test if		
results on the initial oral glucose challenge		
test are abnormal) is preferred because of its		
high sensitivity and specificity. The Women's		
Preventive Services Initiative suggests that		
women with risk factors for diabetes mellitus		
be screened for preexisting diabetes before 24		
weeks of gestation—ideally at the first

Mellitus Screening' recommendation		
Human Immune-Deficiency Virus Counseling & Screening HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends prevention education and risk assessment for human immunodeficiency virus (HIV) infection in adolescents and women at least annually throughout the lifespan. All women should be tested for HIV at least once during their lifetime. Additional screening should be based on risk, and screening annually or more often may be appropriate for adolescents and women with an increased risk of HIV infection. Screening for HIV is recommended for all pregnant women upon initiation of prenatal care with retesting during pregnancy based on risk factors. Rapid HIV testing is recommended for pregnant women who present in active labor with an undocumented HIV status. Screening during pregnancy enables prevention of vertical transmission. Refer also to USPSTF's 'Human Immunodeficiency Virus (HIV) Infection Screening for Pregnant and Non-Pregnant Adolescents and Adults' recommendation Refer also to Bright Future's 'STI/HIV' Screening' recommendations	36415, 86689, 86701, 86702, 86703, 87389, 87390, 87391, 87806, G0432, G0433, G0435, G0475	Payable when billed with a diagnosis code in on Diagnosis List 1
Interpersonal and Domestic Violence Screening HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends screening adolescents and women for interpersonal and domestic violence at least annually, and, when needed, providing or referring for initial intervention services. Interpersonal and domestic violence includes physical violence, sexual violence, stalking and psychological aggression (including coercion), reproductive coercion, neglect, and the threat of violence, abuse, or both. Intervention services include, but are	99401, 99402, 99403, 99404, 99411, 99412, 99384, 99385, 99386, 99387, 99396, 99397, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99417	

not limited to, counseling, education, harm reduction strategies, and referral to appropriate supportive services.		
HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends directed behavioral counseling by a health care provider or other appropriately trained individual for sexually active adolescent and adult women at an increased risk for sexually transmitted infections (STIs). The Women's Preventive Services Initiative recommends that health care providers use a woman's sexual history and risk factors to help identify those at an increased risk of STIs. Risk factors may include age younger than 25, a recent history of an STI, a new sex partner, multiple partners, a partner with concurrent partners, a partner with an STI, and a lack of or inconsistent condom use. For adolescents and women not identified as high risk, counseling to reduce the risk of STIs should be considered, as determined by clinical judgement. Refer also to USPSTF's 'Sexually Transmitted Infections Behavioral Counseling' recommendation	99401, 99402, 99403, 99404, 99411, 99412, 99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, G0445	
HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends screening women for urinary incontinence annually. Screening should ideally assess whether women experience urinary incontinence and whether it impacts their activities and quality of life. The Women's Preventive Services Initiative recommends referring women for further evaluation and treatment if indicated. The Women's Preventive Services Initiative recommends screening women for urinary incontinence as a preventive service. Factors associated with an increased risk for urinary incontinence include increasing parity,	There are no procedure codes specific to this service. This service would be part of the preventive office visit.	Payable with a diagnosis code in Diagnosis List 1

advancing age, and obesity; however, these factors should not be used to limit screening. Several screening tools demonstrate fair to high accuracy in identifying urinary incontinence in women. Although minimum screening intervals are unknown, given the prevalence of urinary incontinence, the fact that many women do not volunteer symptoms, and the multiple, frequently-changing risk factors associated with incontinence, it is reasonable to conduct annually.		
Well-Woman Visits HRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends that women receive at least one preventive care visit per year beginning in adolescence and continuing across the lifespan to ensure that the recommended preventive services, including preconception, and many services necessary for prenatal and interconception care are obtained. The primary purpose of these visits should be the delivery and coordination of recommended preventive services as determined by age and risk factors.	99384, 99385, 99386, 99387, 99394, 99395, 99396, 99397, G0101, G0438, G0439, 99078, 99401, 99402, 99403, 99404, 99411, 99412, 99408, 99409, G0396, G0442, G0443, G0444	Labs administered as part of a normal pregnancy reimbursable at the preventive level when billed with a pregnancy diagnosis

Breastfeeding Equipment & Supplies

Non-grandfathered plans provide coverage of manual, electric, and hospital grade breast pumps along with breastfeeding supplies at the preventive level.

Manual breast pumps utilize procedure code E0602 and are available for purchase and covered at the preventive level when obtained In-Network, Out of Network, or from Retail providers. Sales tax is excluded from retail purchases.

Electric breast pumps utilize procedure code E0603 and must be rented or purchased from an In-Network provider or a contracted durable medical equipment supplier. The models of breast pumps being provided at the preventive level are up to the individual provider's discretion.

If a member chooses to obtain an upgraded model, they may be balance billed the difference between the allowance of the standard model and the cost of the upgraded model. Members are allowed one electric breast pump per benefit period.

*Note: Retail providers such as Target, WalMart, or online vendor are not licensed medical providers and therefore are considered Out of Network. Out of network coverage will follow the out of network benefit level for preventive services. This may include cost sharing and sales tax is excluded. *

Hospital grade breast pumps utilize procedure code E0604 and are only covered when rented In-Network or from an In-Network durable medical equipment supplier. Hospital grade breast pump coverage is up to the purchase price of \$1,000.00 or 12 months, whichever comes first. At the end of coverage, the unit must be returned to the durable medical equipment supplier. Members are allowed one breast pump per benefit period.

Breast pumps obtained from Out of Network providers are reimbursable at the Out of Network level.

The following breast pump supplies are reimbursable at the preventive level. Some limitations and restrictions may apply based on the group coverage for preventive services.

- A4281- Tubing for breast pump, replacement, spare membranes, replacements
- A4282- Adapter for breast pump, replacement
- A4283- Cap for breast pump bottle, replacement
- A4284- Breast shield and splash protector for use with breast pump, replacement
- A4285- Polycarbonate bottle for use with breast pump, replacement
- A4286- Locking ring for breast pump, replacement

<u>Differentiating Preventive Care versus Diagnostic Care</u>

The following types of services are considered Preventive:

- Screenings intended to prevent illness or identify issues before symptoms are evident
- Counseling intervention as defined by a specific preventive recommendation

Examples of preventive services:

- A 60-year-old woman obtains her biennial mammogram to screen for breast cancer
- A patient who has been identified as having cardiovascular disease risk factors is referred for nutritional counseling
- A 50-year-old patient obtains a colonoscopy to screen for colorectal cancer
- A 42-year-old patient goes to their doctor for their annual physical and receives a blood test to screen for abnormal blood glucose

The following types of services are considered Diagnostic:

- The diagnosis of existing symptoms or abnormalities
- Treatment for specific health conditions, ongoing care, or other tests to manage a health condition

Examples of diagnostic services:

- A 60-year-old woman obtains a mammogram after noticing a lump in her breast
- A patient diagnosed with diabetes is referred for nutritional counseling to manage their condition
- A patient goes to their doctor for their annual physical and receives a blood test to check iron and liver function, and a urinalysis is requested

Limitations and Exclusions

- 1. <u>Services not reimbursable at the preventive level may be reimbursable under another portion of the medical plan.</u>
- 2. Breastfeeding equipment and supplies not listed underneath the "Breastfeeding Equipment and Supplies" section. This includes, but is not limited to
 - a. Batteries
 - b. Breastfeeding ointments, creams
 - c. Breast milk storage supplies including bags, freezer packs, etc.
 - d. Breast pump cleaning supplies
 - e. Breast pump traveling cases
 - f. Infant scales
 - g. Nursing bras
 - h. Nursing covers, scarfs
- 3. Immunizations that are not published in the Center for Disease Control's Morbidity and Mortality Weekly Report (MMWR) and/or are not on the list of "Vaccines Licensed for Use in the United States" by the United States Food and Drug Administration (FDA).
- 4. Prescription coverage may vary depending on the terms and conditions of the plans. A prescription may be required for coverage under the pharmacy benefit. The plan may also require that the generic drug be tried first before the brand version. Age limits, restrictions, and other requirements may apply. Members can verify their pharmacy benefits by calling the customer service number on the back of their ID card.
- 5. For OTC purchases, members will need to obtain a prescription from their provider and take it to the pharmacy to be filled.
- 6. Exceptions may apply, members can verify their pharmacy benefits by calling the customer service number on the back of their ID card.
- 7. If there is a medication not included, the member should consult their doctor for therapeutic alternatives first before submitting coverage exceptions to BCBS.

Each benefit plan, summary plan description or contract defines which services are covered, which services are excluded, and which services are subject to dollar caps or other limitations, conditions or exclusions. Members and their providers have the responsibility for consulting the member's benefit plan, summary plan description or contract to determine if there are any exclusions or other benefit limitations applicable to this service or supply. If there is a discrepancy between a MEDICAL POLICY and a member's benefit plan, summary plan description or contract, the benefit plan, summary plan description or contract will govern.

The Plan makes no endorsement, representations or warranties regarding any products or services offered by independent third-party vendors such as Target and WalMart. These vendors are solely responsible for the products and services they offer. If you have any questions about the products or services offered by such vendors, you should contact the vendor(s) directly.

Addendum:

Blue Cross Blue Shield of Texas

Additional Coverage - The Plan will provide coverage for 1) All colorectal cancer examinations, preventive services and lab test assigned a grade, now or in the future, of "A" or "B" by the US Preventive Services Task Force for average-risk individuals and 2) An initial colonoscopy or other medical test or procedure for colorectal cancer screening as well as a follow-up colonoscopy if the initial results are abnormal.

For additional information, please check the Plan's website or contact your Network Management Office.
