

CLINICAL PAYMENT AND CODING POLICY

If a conflict arises between a Clinical Payment and Coding Policy (CPCP) and any plan document under which a member is entitled to Covered Services, the plan document will govern. If a conflict arises between a CPCP and any provider contract pursuant to which a provider participates in and/or provides Covered Services to eligible member(s) and/or plans, the provider contract will govern. "Plan documents" include, but are not limited to, Certificates of Health Care Benefits, benefit booklets, Summary Plan Descriptions and other coverage documents. BCBSTX may use reasonable discretion interpreting and applying this policy to services being delivered in a particular case. BCBSTX has full and final discretionary authority for their interpretation and application to the extent provided under any applicable plan documents.

Providers are responsible for submission of accurate documentation of services performed. Providers are expected to submit claims for services rendered using valid code combinations from Health Insurance Portability and Accountability Act (HIPAA) approved code sets. Claims should be coded appropriately according to industry standard coding guidelines including, but not limited to: Uniform Billing (UB) Editor, American Medical Association (AMA), Current Procedural Terminology (CPT[®]), CPT[®] Assistant, Healthcare Common Procedure Coding System (HCPCS), ICD-10 CM and PCS, National Drug Codes (NDC), Diagnosis Related Group (DRG) guidelines, Centers for Medicare and Medicaid Services (CMS) National Correct Coding Initiative (NCCI) Policy Manual, CCI table edits and other CMS guidelines.

Claims are subject to the code edit protocols for services/procedures billed. Claim submissions are subject to claim review including but not limited to, any terms of benefit coverage, provider contract language, medical policies, clinical payment and coding policies as well as coding software logic. Upon request, the provider is urged to submit any additional documentation.

Preventive Services Policy

Policy Number: CPCP006

Version: 1.0

Enterprise Clinical Payment and Coding Policy Committee Approval Date: June 22, 2022

Effective Date: July 1, 2022

Definitions

The following acronyms have been utilized throughout this reimbursement policy

ACIP:	Advisory Committee on Immunization Practices
CDC:	Centers for Disease Control and Prevention
FDA:	United States Food and Drug Administration
HRSA:	Health Resources and Services Administration
PPACA:	Patient Protection and Affordable Care Act of 2010
USPSTF:	United States Preventive Services Task Force

Description

Section 2713 of the Patient Protection and Affordable Care Act (PPACA) mandates that private health plans provide coverage of preventive services issued by the following agencies: The United States Preventive Services Task Force (USPSTF), the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC), and the Health Resources and Service Administration (HRSA) with respect to women's guidelines and guidelines for infants, children, and adolescents. These services are available at no cost-share when obtained by a member covered under a non-grandfathered plan. This applies to members belonging to individual, small group, large group, and self-insured plans. There is no copay, deductible or coinsurance, even if the individual or family deductible or out-of-pocket maximum has not been met as long as the member utilizes a provider in the plan's network.

Preventive care or preventive medicine refers to measures or services taken to promote health and early detection/prevention of disease(s) and injuries rather than treating them and/or curing them. Preventive care may include, but are not limited to, examinations and screening tests tailored to an individual's age, health, and family history.

PPACA does not mandate that preventive services be covered at no member cost-share when obtained out-of-network. Members that obtain preventive services out of their network will be subject to copay, deductible, and coinsurance.

Grandfathered plans are plans that have been in existence prior to March 23, 2010 and are exempt from the requirement of providing preventive services at no member cost share. Grandfathered plans have the opportunity to elect providing coverage of preventive services at no member cost share but are not required to do so.

The USPSTF applies a letter grade for each of the recommendations that are released. The grade definitions for USPSTF recommendations released after July 2012 are as follows https://www.uspreventiveservicestaskforce.org/Page/Name/grade-definitions

Following the recommendation of the USPTF coverage of Grade "A" and "B" recommendations is provided at no member cost share for members with a non-grandfathered health plan. The USPTF published recommendations can be found at

https://www.uspreventiveservicestaskforce.org/BrowseRec/Index

Grade	Definition
Uraue	
Α	The USPSTF recommends the service. There is high
	certainty that the net benefit is substantial.
В	The USPSTF recommends the service. There is high
	certainty that the net benefit is moderate or there is
	moderate certainty that the net benefit is moderate to
	substantial.
ſ	The USPSTF recommends selectively offering or providing
C	this service to individual patients based on professional
	judgment and patient preferences. There is at least
	moderate certainty that the net benefit is small.
D	The USPSTF recommends against the service. There is
U	moderate or high certainty that the service has no net
	benefit or that the harms outweigh the benefits.
	The USPSTF concludes that the current evidence is
I	insufficient to assess the balance of benefits and harms of
	the service. Evidence is lacking, of poor quality, or
	conflicting, and the balance of benefits and harms cannot
	be determined.

The ACIP publishes recommendations on the safe utilization of vaccines. ACIP's recommendations include immunization schedules for children and adolescents as well as adults which can be found at https://www.cdc.gov/vaccines/schedules/hcp/index.html. Travel Immunizations such as, but not limited to, Japanese Encephalitis, Typhoid, Yellow Fever, and Small Pox are excluded from Preventive Service coverage. Other excluded vaccinations include Anthrax, Bacille Calmette Guerin for Tuberculosis (BCG), and Rabies which are not required by PPACA. Immunizations should be administered in accordance with the ACIP Recommended Child and Adult Immunization Schedules or in accordance with state law or regulations.

HRSA releases Women's Preventive Services guidelines that are aimed at improving women's health by recommending certain preventive services that should be obtained in the clinical setting. HRSA's list of recommendations can be obtained at <u>https://www.hrsa.gov/womensguidelines2016/index.html</u>.

HRSA endorses preventive guidelines established by the American Academy of Pediatrics for the health and well-being of infants, children, and adolescents. These recommendations are referred to as Bright Futures and the comprehensive list of Bright Future's recommendations can be found at <u>https://www.aap.org/en-us/Documents/practicet_periodicity_AllVisits.pdf</u>.

Reimbursement Information:

Certain preventive care services may be considered eligible for coverage under the member's benefit plan as required by PPACA and/or an applicable state mandate. In general, these services include, but are not limited to, screenings, immunizations, and other types of care as recommended by the United States Federal Government.

These services are not subject to application of cost-sharing such as co-payments, co-insurance or deductibles when they are considered eligible for coverage and are provided by a network provider. In order for preventive claims to process at the preventive level with no member cost share, the claim must include a preventive diagnosis code, a preventive procedure code, meet medical policy review criteria, and fall within the guidelines issued by the USPSTF, ACIP, HRSA, or Bright Futures.

Health care providers (facilities, physicians and other health care professionals) are expected to exercise independent medical judgement in providing care to patients. This Preventive Services Reimbursement policy is not intended to impact care decisions or medical practice.

The following grid provides a list of the recommendations released by the USPSTF, ACIP, HRSA, or Bright Futures along with the corresponding procedure codes and diagnosis codes deemed to be preventive.

Service:	Procedure	Additional
	Code(s):	Reimbursement Criteria:
Abdominal Aortic Aneurysm Screening <u>USPSTF "B" Recommendation December</u> <u>2019</u> The USPSTF recommends 1-time screening for abdominal aortic aneurysm (AAA) with ultrasonography in men aged 65 to 75 years	76706	Procedure code 76706 is reimbursable as preventive when submitted with one of the following: Z13.6, Z87.891, Z72.0, Z00.00, Z00.01, F17.210, F17.200
who have ever smoked. Unhealthy Alcohol Use in Adolescents and Adults: Screening and Behavioral Counseling Interventions USPSTF "B" Recommendation November 2018 The USPSTF recommends screening for unhealthy alcohol use in primary care settings for adults 18 years or older, including pregnant women, and providing persons engaged in risky or hazardous drinking with brief behavioral counseling interventions to reduce unhealthy alcohol use.	99385, 99386, 99387, 99395, 99396, 99397, 99408, 99409, G0396, G0397, G0442, G0443	Payable with a diagnosis code in Diagnosis List 1
Aspirin Use to Prevent Preeclampsia and Related Morbidity and Mortality: Preventive Medication USPSTF "B" Recommendation September 2021 The USPSTF recommends the use of low-dose aspirin (81 mg/day) as preventive medication		For details about pharmacy benefit coverage, contact the number on the patient's BCBSTX member card. A patient's pharmacy benefit may be managed by a company other than BCBSTX.

USPSTF Recommendations:

after 12 weeks of gestation in persons who are at high risk for preeclampsia. Asymptomatic Bacteriuria in Adults Screening <u>USPSTF "B" Recommendation September</u> <u>2019</u> The USPSTF recommends screening for asymptomatic bacteriuria using urine culture in pregnant persons.	81007, 87086, 87088	Coverage includes generic aspirin 81 mg tablets with a prescription. Payable with a Pregnancy Diagnosis
BRCA-Related Cancer Risk Assessment, Genetic Testing <u>USPSTF "B" Recommendation August 2019</u> USPSTF recommends that primary care clinicians assess women with a personal or family history of breast, ovarian, tubal, or peritoneal cancer or who have an ancestry associated with breast cancer susceptibility 1 and 2 (BRCA1/2) gene mutations with an appropriate brief familial risk assessment tool. Women with a positive result on the risk assessment tool should receive genetic counseling and, if indicated after counseling, genetic testing.	81212, 81215, 81216, 81217, 81162, 81163, 81164, 81165, 81166, 81167, 96040, 99385, 99386, 99387, 99395, 99396, 99397, 99401, 99402, 99403, 99404, G0463, S0265, 81307, 81308	These services are subject to Medical Policy and prior authorization may be required Procedure codes 81212, 81215- 81217, 81162-81167, 81307 and 81308 are reimbursable as preventive when submitted with one of the following primary diagnosis codes: Z80.3, Z80.41, Z85.3, Z85.43 Procedure code 96040 is reimbursable as preventive when submitted with one of the following primary diagnosis codes: Z80.3 or Z80.41 All other procedure codes for BRCA are payable with a diagnosis in Diagnosis List 1
Breast Cancer Medications for Risk Reduction USPSTF "B" Recommendations September 2019 The USPSTF recommends that clinicians offer to prescribe risk-reducing medications, such as tamoxifen, raloxifene, or aromatase inhibitors, to women who are at increased risk for breast cancer and at low risk for adverse medication effects.		For details about pharmacy benefit coverage, contact the number on the patient's BCBSTX member card. A patient's pharmacy benefit may be managed by a company other than BCBSTX. Coverage includes generic anastrozole 1 mg, raloxifene hcl 60 mg, and tamoxifen citrate 10 and 20 mg tablets when used for prevention in members ages 35 and over with a prescription.

Diabetes Mellitus Screening after Pregnancy	82947, 82948, 82950, 82951,	Payable with a diagnosis code in Diagnosis List 1
HRSA Recommendation	83036	
December 2019		
The Women's Preventive Services Initiative		
recommends women with a history of		
gestational diabetes mellitus (GDM) who are		
not currently pregnant and who have not		
been previously diagnosed with type 2		
diabetes mellitus should be screened for		
diabetes mellitus. Initial testing should ideally		
occur within the first year postpartum and can be conducted as early as 4–6 weeks		

postpartum. Women with a negative initial postpartum screening test result should be rescreened at least every 3 years for a minimum of 10 years after pregnancy. For women with a positive postpartum screening test result, testing to confirm the diagnosis of diabetes is indicated regardless of the initial test (e.g., oral glucose tolerance test, fasting plasma glucose, or hemoglobin A1c). Repeat testing is indicated in women who were screened with hemoglobin A1c in the first 6 months postpartum regardless of the result. Gestational Diabetes <u>HRSA Recommendation December 2019</u> The Women's Preventive Services Initiative recommends screening pregnant women for gestational diabetes mellitus after 24 weeks of gestation (preferably between 24 and 28 weeks of gestation) in order to prevent adverse birth outcomes. Screening with a 50 g oral glucose challenge test (followed by a 3- hour 100 g oral glucose tolerance test if results on the initial oral glucose challenge test are abnormal) is preferred because of its high sensitivity and specificity. The Women's Preventive Services Initiative suggests that women with risk factors for diabetes mellitus be screened for preexisting diabetes before 24 weeks of gestation—ideally at the first prenatal visit, based on current clinical best practices. <i>Refer also to USPSTF's 'Gestational Diabetes</i> <i>Mellitus Screening' recommendation</i>	82947, 82948, 82950, 82951, 83036	Payable with a pregnancy diagnosis
Human Immune-Deficiency Virus Counseling & ScreeningHRSA Recommendation December 2019 The Women's Preventive Services Initiative recommends prevention education and risk assessment for human immunodeficiency virus (HIV) infection in adolescents and women at least annually throughout the lifespan. All women should be tested for HIV at least once during their lifetime. Additional screening should be based on risk, and	36415, 86689, 86701, 86702, 86703, 87389, 87390, 87391, 87806, G0432, G0433, G0435, G0475	Payable when billed with a diagnosis code in on Diagnosis List 1

an increased risk of HIV infection. Screening for HIV is recommended for all pregnant women upon initiation of prenatal care with retesting during pregnancy based on risk factors. Rapid HIV testing is recommended for pregnant women who present in active labor with an undocumented HIV status. Screening during pregnancy enables prevention of vertical transmission. <i>Refer also to USPSTF's 'Human Immunodeficiency Virus (HIV) Infection Screening for Pregnant and Non-Pregnant Adolescents and Adults' recommendation Refer also to Bright Future's 'STI/HIV' Screening' recommendations Interpersonal and Domestic Violence Screening HRSA Recommendation December 2019</i>	99401, 99402, 99403, 99404, 99411, 99412, 99384, 99385	
The Women's Preventive Services Initiative	99384, 99385, 99386, 99387,	
recommends screening adolescents and	99394, 99395,	
women for interpersonal and domestic violence at least annually, and, when needed,	99396, 99397, 99202, 99203,	
providing or referring for initial intervention	99204, 99205,	
services. Interpersonal and domestic violence includes physical violence, sexual violence,	99211, 99212, 99213, 99214,	
stalking and psychological aggression	99215, 99214, 99215, 99417	
(including coercion), reproductive coercion,		
neglect, and the threat of violence, abuse, or both. Intervention services include, but are

ideally assess whether women experience		
urinary incontinence and whether it impacts		
their activities and quality of life. The		
Women's Preventive Services Initiative		
recommends referring women for further		
evaluation and treatment if indicated. The		
Women's Preventive Services Initiative		
recommends screening women for urinary		
incontinence as a preventive service. Factors		
associated with an increased risk for urinary		
incontinence include increasing parity,		
advancing age, and obesity; however, these		
factors should not be used to limit screening.		
-		
Several screening tools demonstrate fair to		
high accuracy in identifying urinary		
incontinence in women. Although minimum		
screening intervals are unknown, given the		
prevalence of urinary incontinence, the fact		
that many women do not volunteer		
symptoms, and the multiple, frequently-		
changing risk factors associated with		
incontinence, it is reasonable to conduct		
annually.		

Well-Woman Visits	99384, 99385,	Labs administered as part of a
	99386, 99387,	normal pregnancy reimbursable at
HRSA Recommendation December 2019	99394, 99395,	the preventive level when billed
The Women's Preventive Services Initiative	99396, 99397,	with a pregnancy diagnosis
recommends that women receive at least one	G0101, G0438,	
preventive care visit per year beginning in	G0439, 99078,	
adolescence and continuing across the	99401, 99402,	
lifespan to ensure that the recommended	99403, 99404,	
preventive services, including preconception,	99411, 99412,	
and many services necessary for prenatal and	99408, 99409,	
interconception care are obtained. The	G0396, G0442,	
primary purpose of these visits should be the	G0443, G0444	
delivery and coordination of recommended		
preventive services as determined by age and		
risk factors.

Breastfeeding Equipment & Supplies

Non-grandfathered plans provide coverage of manual, electric, and hospital grade breast pumps along with breastfeeding supplies at the preventive level.

Manual breast pumps utilize procedure code E0602 and are available for purchase and covered at the preventive level when obtained In-Network, Out of Network, or from Retail providers. Sales tax is excluded from retail purchases.

Electric breast pumps utilize procedure code E0603 and must be rented or purchased from an In-Network provider or a contracted durable medical equipment supplier. The models of breast pumps being provided at the preventive level are up to the individual provider's discretion. If a member chooses to obtain an upgraded model, they may be balance billed the difference between the allowance of the standard model and the cost of the upgraded model. Members are allowed one electric breast pump per benefit period.

*Note: Retail providers such as Target, WalMart, or online vendor are not licensed medical providers and therefore are considered Out-of-Network. Out-of-network coverage will follow the out of network benefit level for preventive services. This may include cost sharing and sales tax is excluded. *

Hospital grade breast pumps utilize procedure code E0604 and are only covered when rented In-Network or from an In-Network durable medical equipment supplier. Hospital grade breast pump coverage is up to the purchase price of \$1,000.00 or 12 months, whichever comes first. At the end of coverage, the unit must be returned to the durable medical equipment supplier. Members are allowed one breast pump per benefit period.

Breast pumps obtained from Out of Network providers are reimbursable at the Out-of-Network level.

The following breast pump supplies are reimbursable at the preventive level. Some limitations and restrictions may apply based on the group coverage for preventive services.

- A4281- Tubing for breast pump, replacement, spare membranes, replacements
- A4282- Adapter for breast pump, replacement
- A4283- Cap for breast pump bottle, replacement
- A4284- Breast shield and splash protector for use with breast pump, replacement
- A4285- Polycarbonate bottle for use with breast pump, replacement
- A4286- Locking ring for breast pump, replacement

Differentiating Preventive Care versus Diagnostic Care

The following types of services are considered Preventive:

- Screenings intended to prevent illness or identify issues before symptoms are evident
- Counseling intervention as defined by a specific preventive recommendation

Examples of preventive services:

- A 60-year-old woman obtains her biennial mammogram to screen for breast cancer
- A patient who has been identified as having cardiovascular disease risk factors is referred for nutritional counseling
- A 50-year-old patient obtains a colonoscopy to screen for colorectal cancer
- A 42-year-old patient goes to their doctor for their annual physical and receives a blood test to screen for abnormal blood glucose

The following types of services are considered Diagnostic:

- The diagnosis of existing symptoms or abnormalities
- Treatment for specific health conditions, ongoing care, or other tests to manage a health condition

Examples of diagnostic services:

- A 60-year-old woman obtains a mammogram after noticing a lump in her breast
- A patient diagnosed with diabetes is referred for nutritional counseling to manage their condition
- A patient goes to their doctor for their annual physical and receives a blood test to check iron and liver function, and a urinalysis is requested

Limitations and Exclusions

- 1. <u>Services not reimbursable at the preventive level may be reimbursable under another portion of the medical plan.</u>
- 2. Breastfeeding equipment and supplies not listed underneath the "Breastfeeding Equipment and Supplies" section. This includes, but is not limited to
 - a. Batteries
 - b. Breastfeeding ointments, creams
 - c. Breast milk storage supplies including bags, freezer packs, etc.
 - d. Breast pump cleaning supplies
 - e. Breast pump traveling cases
 - f. Infant scales
 - g. Nursing bras
 - h. Nursing covers, scarfs

- Immunizations that are not published in the Center for Disease Control's Morbidity and Mortality Weekly Report (MMWR) and/or are not on the list of "Vaccines Licensed for Use in the United States" by the United States Food and Drug Administration (FDA).
- 4. Prescription coverage may vary depending on the terms and conditions of the plans. A prescription may be required for coverage under the pharmacy benefit. The plan may also require that the generic drug be tried first before the brand version. Age limits, restrictions, and other requirements may apply. Members can verify their pharmacy benefits by calling the customer service number on the back of their ID card.
- 5. For OTC purchases, members will need to obtain a prescription from their provider and take it to the pharmacy to be filled.
- 6. Exceptions may apply, members can verify their pharmacy benefits by calling the customer service number on the back of their ID card.
- 7. If there is a medication not included, the member should consult their doctor for therapeutic alternatives first before submitting coverage exceptions to BCBSTX.

Each benefit plan, summary plan description or contract defines which services are covered, which services are excluded, and which services are subject to dollar caps or other limitations, conditions or exclusions. Members and their providers have the responsibility for consulting the member's benefit plan, summary plan description or contract to determine if there are any exclusions or other benefit limitations applicable to this service or supply. If there is a discrepancy between a MEDICAL POLICY and a member's benefit plan, summary plan description or contract, the benefit plan, summary plan description or contract, the benefit plan, summary plan description or contract will govern.
